**M**y name is João (John in English), I'm 23 years old and I hope to show a little of me in this curriculum vitae. I'm born and raised in S. João da Madeira, a small town in northern Portugal. At 18 I moved to Aveiro to accomplish the most challenging stage of my life, university. I am a compulsive traveler, obsessed with movies and admirer of good music. I also love to work in my kitchen garden. I'm creative, enjoy to build things with my own hands, whether sand castles or aircraft modeling. I like to state "I can do..." and prove that I could. I try to explain my way of thinking and argue my ideas in the clearest way possible, sometimes sinning by excessive stubbornness. In this old "festival poster" follows a resume of what I've learned in 23 years.
